II. Work Experience

1999 to Present

American Risk Management Resource Network, LLC. Principal,

ARMR.Network is a specialty environmental insurance brokerage firm. Our customized insurance products are sold through hundreds of insurance agencies in the United States and Canada. Over the past 28 years I have worked on the placement of literally thousands of environmental insurance transactions both as the placing broker and as the Global Environmental Practice Leader of Willis, the third largest insurance brokerage firm in the world.

Insurance and risk management consulting assignments at ARMR.Network include; writing the insurance specifications and conducting insurance compliance reviews for bidders on five hundred million dollars of fixed price remediation services, serving as an expert witness on disputed environmental insurance and cost cap insurance claims with amounts in dispute measured in the tens of millions of dollars, compiling the history of the environmental insurance market complete with reconstructive pricing and underwriting guidelines for individual risks from 1980 to date, creating business plans for environmental insurance sales, developing new insurance products complete with policy forms, pricing models and underwriting guidelines, environmental risk management consulting, insurance issues associated with mold damages, proof of financial responsibility financial product efficacy, facilitating culture change in insurance brokerage operations and internet based knowledge sharing platforms.

Consulting projects have been completed for a broad range of clients including the US EPA, US Justice Department, US Army Corps of Engineers, US Army Environmental Center, Los Angeles County School District, The California Solid Waste Board, Arthur J Gallagher, Wells Fargo, The World Bank and numerous other fact and expert witness assignments associated with environmental insurance.

1999 to Present

Environmental Risk Resources Association, Founder

The Environmental Risk Resources Association was created in 1999 to enhance the use of environmental insurance as a risk management tool. I created the organization by developing the business plan and soliciting the cooperation and financial support from the leading underwriters and brokers of environmental insurance. ERRA produces educational seminars on current environmental risk management issues, produces newsletters, and hosts an internet based environmental risk resources library.

ERRA is a federally registered not for profit 501 educational organizations and has been approved in over thirty states for continuing education credits in insurance and law.

2002 International Risk Group, President

IRG is the insurance branch of a leading brownfield development corporation.

2001 Aon, Mid West Environmental Insurance Director

I worked as an environmental risk management resource in the environmental practice of the second largest insurance brokerage firm in the world.

1990 to 1999

Willis Global Environmental Practice, Managing Director

I created the first functioning fully staffed environmental resource group in a major brokerage firm. The Willis Environmental Practice served as a technical resource to the insurance brokers of Willis. Our activities in the environmental practice included broker training, joint client calls, gathering market intelligence, assembling pricing benchmarks, trouble shooting on difficult insurance placements and claim issues, managing insurance company relationships, and quality assurance on hundreds of environmental insurance placements. Over this time period the Global Environmental Practice at Willis produced over \$250,000,000 in environmental insurance premiums for thousands of clients.

Willis pioneered the development of multi-disciplined technical resource supported environmental insurance production in the insurance brokerage industry. Employing environmental engineers, lawyers, industrial hygienists and environmental insurance experts, the environmental practice was able to deliver the specialized environmental risk management expertise to the field offices which enabled Willis brokers to develop innovative solutions to environmental risk management problems.

During this time frame the book of environmental business grew from less than one million dollars in commissions in 1990 to over fourteen million dollars in 1999. The Willis environmental practice consistently outperformed the overall environmental insurance industry in terms of growth on an annual basis. The basic design of the multi disciplined resource supported environmental practice has set the standard for the insurance brokerage industry and has been copied by the major competitors of Willis.

Significant environmental insurance placement innovations that were pioneered in the Willis Environmental Practice between 1990-1999 included designing and placing the insurance on the Clean-Up of Chernobyl on a wrap up for contractors working for the World Bank in London, designing the first contractor controlled, fully insured liability buy out for a superfund site in Maine, insuring the Clean-Up of the Oak Ridge, TN. nuclear weapons facility for Bechtel, insuring the Clean-Up of the Hanford, WA nuclear weapons facility for Fluor Daniel, insuring the design professional liability and environmental liabilities of the Los Angeles County Mass Transit Authority subway/light rail construction project and designing and implementing the first contract specific, fully cost reimbursed environmental insurance programs for EPA superfund contractors.

1998 to 1999

Willis Corroon America, Chief Knowledge Officer

I worked on a team to create a corporate knowledge sharing culture intranet site at Willis culture. In this role I was the corporate staff person in charge of coordinating all of the specialty practices within the firm. As the Chief Knowledge Officer I served on the twenty person executive committee of Willis Corroon Americas.

1983 to 1990

Corroon and Black, Insurance Brokers, Vice President

As a retail insurance broker out of Milwaukee, Wisconsin I built and serviced a multi-line book of business. Most accounts were in the environmental services sector with a particular emphasis on EPA Superfund contractors and waste transporters.

From 1985 through 1989 I qualified for the "Exceptional Producer" award, the company's highest sales performance award. Only 1% of the sales force qualified for this award in five consecutive years.

In 1986 I developed the first professional liability insurance policy to specifically insure environmental loss exposures for engineers working on environmental remediations.

In 1986 I pioneered the development of the Contractors Pollution Liability product line working as a consultant to the EPA Superfund Contractors Indemnification Task Force.

1982 to 1983

Frank B Hall, Insurance Broker, Producer

This was an all lines insurance production position. I specialized in group programs for environmental insurance.

1980 to 1982

Risk Treatment Services, Consultant

RTS performed captive management services for twelve Colorado based captive insurance companies. My responsibilities there included review of state financial filings for insurance company operations and feasibility studies.

As an insurance consultant to Johns Manville in asbestos litigation I reconstructed their insurance program from 1932 to 1980 and answered interrogatories for the ensuing insurance coverage litigation. Insurance archiving for toxic tort claims later became a profession onto its self.

III. Recent Consulting, Expert and Fact Assignments

Review the procurements of Fixed Price Remediations for the US Army Environmental Center. The contract value was \$500,000,000. Washington DC.

Develop a business plan to create a specialty wholesale insurance broker on a national scale, projects in Colorado and Illinois.
